SKILLS

- **Languages:** HTML, CSS, JavaScript, Python, R, C, C++, Java, EJS
- **Frameworks & Libraries:** Node.js, Express.js, Bootstrap, React
- **Databases:** SQL, MongoDB, Firebase
- **Tools:** Microsoft Office Suite, Git, Figma, Trello, Jupyter, Tableau
- **Data:** Data Collection, Data Cleaning, Data Visualization, Machine Learning (scikit-learn, TensorFlow, PyTorch, Hugging Face), Statistical Analysis

TECHNICAL PROJECTS

Job Scam Detector – Flask AI Web App

Mar - April 2025

- Built a job scam detection tool using a neural network MLPClassifier, evaluated against logistic regression, random forest, and Naive Bayes in 5-fold cross-validation
- Extracted TF-IDF n-gram features and keyword flags to maximize high F1 score and enable real-time scam predictions through a responsive web application

Wellbot – Fitness web application

May – June 2024

- Collaborated with a team to develop features for generating and customizing workouts, and tracking macros, to enhance fitness tracking accuracy
- Implemented secure user authentication and data management in MongoDB to ensure data integrity and user privacy

Pathway Analysis: Relationship Status Impact on Happiness

Mar 2021 – Nov 2023

- Conducted mediation analysis in R to examine factors influencing the association of relationship status and happiness during COVID-19
- Presented research findings at the Canadian Human Connection conference, highlighting implications for improving happiness during the pandemic

EXTRACURRICULAR ACTIVITIES

Sustainable Recipes - NwHacks 2024 Hackathon

Jan 2024

- Collaborated with a team of 4 to build a web app that generates recipes in under 24 hours
- Utilized Firebase database to store and manage user authentication data in real-time

VanML Data Science Hackathon - Winner 2023

Sept 2023

- Analyzed 211 BC Helpline call data pre- and post-COVID-19, identifying main call concerns
- Created a correlation plot in R to analyze the relationship between BC Helpline calls and COVID-19 cases, emphasize potential correlation factors
- Presented insights on data analysis and suggested implications for future crisis plans

WORK EXPERIENCE

Team Member/Researcher, Pivot 2020

Oct – Dec 2020

- Gathered data on Canadian cities through research methods (indexes, surveys, and interviews) to develop a youth-focused, accessible data hub
- Analyzed primary data on Canadian cities using Google Sheets, generating data reports
- Presented a PowerPoint on Metro Vancouver's tourist attractions to support area promotion

EDUCATION

British Columbia Institute of Technology

Sept 2023 – May 2025

- Diploma – Computer Systems Technology, Predictive Analytics

Simon Fraser University

Sept 2016 – Apr 2022

- Bachelor of Science - Health Sciences, Life Sciences
